sivi™
Passion Flower

For Stress Relief
And Quality Sleep

What is SIVI?

SIVI™ is a clinically proven **Branded Ingredient**, 100% pure ***Passiflora incarnata*** (Passion flower) standardized extract, crafted to naturally reduce stress and promote high quality sleep. Derived from an exceptional variety of *Passiflora incarnata* with the highest naturally occurring Vitexin content, the key bioactive behind its remarkable efficacy, it offers a natural, science backed solution for modern wellness formulations. Researched & Processed to contain natural GABA and magnesium.

Passiflora Incarnata

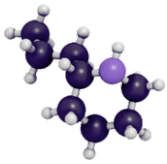
Quick Facts

- **Botanical:** *Passiflora incarnata.*
- **Standardization:** Vitexin as flavonoids.
- **Dose:** 600mg/day.
- **Benefits:** Stress Relief & Sound Sleep.
- **Applications:** Capsules, Gummies, Beverages & More.

How SIVI Works:

- **Unique Variety**

  SIVI begins with a proprietary *Passiflora incarnata* strain naturally richest in GABA and Vitexin. Farmers repropagate from select mother roots to lock in genetic potency, ensure pesticide-free harvests, and guarantee batch-to-batch consistency, so that formulators get the same calming power every time.



- **High-Vitexin Flavonoid**

  SIVI is rich in natural flavonoid Vitexin. This flavonoid works synergistically to reduce stress hormones and acts as an antioxidant to protect neurons, promoting a calm mood and relaxed nervous system.

- **GABA Modulation**

  SIVI naturally contains GABA and compounds that enhance GABA-ergic activity in the brain. By increasing GABA levels and receptor binding, SIVI helps quiet neuronal activity. This leads to a faster onset of sleep and deeper, more restorative sleep phases.

Published Clinical Study:

"Randomized, Double-Blind, Placebo-Controlled, Clinical Study of *Passiflora incarnata* in Participants with Stress and Sleep Problems" Harit MK, Mundhe N, Tamoli S Sr, Pawar V, Bhapkar V, Kolhe G, Mahadik S, Kulkarni A, Agarwal A. Cureus. 2024 Mar 20;16(3):e56530. doi: 10.7759/cureus.56530. e Collection 2024 Mar. PMID: 38646244.

Clinical Study Highlights:

67% Reduction in Number of Awakenings

40% Reduction in Daytime Fatigue

28% Reduction in Stress Levels

35% Reduction in Severity of Insomnia

13% Increase in Total Sleep Time

41% Reduction in To Sleep Onset

64% Reduction in Wake Time After Sleep Onset
